

EDUCATION

Degree	Specialization	Institute	Year	CPI
M.Sc	Data Science	Loyola Academy	2025	8.03
B.Sc	Statistics	Little Flower College	2022	8.2
Intermediate	Physics, Chemistry & Mathematics	Gayatri College	2019	780

WORK EXPERIENCE

- **Software Developer** *[DX Engineers]* Oct 2023 – Oct 2024
 - Contributed to building an **AI-powered database interaction platform** that enabled users to retrieve data using natural language prompts instead of writing SQL queries, reducing manual query-writing effort for common data access tasks.
 - Developed responsive frontend interfaces using **React** and **Next.js**, enabling users to submit prompts and visualize structured query responses generated by the AI system.
 - Built and maintained UI components for the query interface, focusing on usability, responsiveness, and visual consistency.
 - Collaborated with backend engineers to design and consume **REST APIs** using **Express**, integrating data seamlessly into the frontend.
 - Resolved frontend bugs and interface issues, improving the overall user experience and reducing friction in core user flows.

PROJECTS

- **Digital Payments & Wallet Platform** github.com/deekshithreddy34/payments-gateway
 - Architected a **monorepo-based digital wallet platform** with user/merchant applications, shared packages, PostgreSQL, and auxiliary Express services.
 - Implemented **bank on-ramp workflows using webhooks**, atomically updating wallet balances and transaction states with Prisma/PostgreSQL.
 - Built **P2P transfers with transactional debit/credit operations and balance validation**, addressing consistency during concurrent transfers.
- **Real-Time Chess App** github.com/deekshithreddy34/chess-app
 - Built an interactive **browser-based chess application** using React and `chess.js`, implementing chess rules, legal move validation, and game-state management.
 - Designed a **component-based chessboard UI** with Recoil for centralized state management and synchronized board/game state across components.
 - Implemented core gameplay flows including **piece movement, turn management, move validation, and game-state updates**.
- **Stock Exchange Platform** github.com/deekshithreddy34/exchange
 - Designed a **decoupled exchange architecture** separating REST APIs, in-memory order-matching engine, WebSocket market-data service, and asynchronous database processing.
 - Implemented **Redis-based queues and Pub/Sub** for inter-service communication and real-time propagation of order and trade events.
 - Developed **market and limit order workflows with bid/ask order books**, integrating time-series trade data for real-time market visualization.

ACHIEVEMENTS

- Earned a LeetCode **100-day streak badge** for consistency and solved **250+ problems**. leetcode.com/u/deekshithsripati
- **Portfolio:** portfolio-taupe-five-48.vercel.app

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, SQL, HTML, CSS

- **Frameworks & Libraries:** React.js, Next.js, Express.js, Node.js, Recoil, Tailwind CSS
- **DevOps & Tools:** Docker, Kubernetes, Git
- **Databases & Messaging:** PostgreSQL, MySQL, Prisma ORM, Redis
